Work History

Rocket Mortgage Canada 2022-06 - Current

Full Stack Developer - Windsor, ON

- o Designed responsive UIs using Angular through collaboration with UX, Product and Business teams.
- o Integrated and tested changes in a complex architecture utilizing dozens of custom micro-services and AWS systems (RDS, SQS, SNS, S3, Lambda)
- o Diagnosed urgent issues quickly on-call, utilizing Cloudwatch and Splunk logs, to ensure seamless deal closures for agents.
- o Designed and refactored various .NET APIs utilizing Entity Framework and various others
- o Conducted testing in Jasmine, NUnit and verified code quality with SonarQube

White Whale Analytics 2019-10 - 2021-03

Full Stack Developer - Calgary, AB

- o Engineered innovative features utilizing React, Redux, Node.js, Hapi.js, and Docker, to enhance functionality for proprietary applications.
- o Implemented Unit and Integration testing frameworks (Mocha.js and Jest) to ensure code reliability and robustness.
- o Participated in meetings and presentations to provide technical expertise and guidance to clients.

Critical Mass 2019-01 - 2019-09

React & JS Developer - Calgary, AB

- o Contributed to development of high-traffic websites for Mazda and Magento e-commerce platform for Blizzard Entertainment.
- o Developed new components and responsive pages using React.
- o Utilized Agile methodologies through sprint planning sessions and using tools like JIRA for task management.

Cor.AI 2017-09 - 2018-12

Full Stack Developer, Windsor, ON

- o Engineered a cloud-based cardiac rehabilitation app leveraging HTML/CSS, JS, Node.js, MySQL, and frameworks (ie. Express, D3.js)
- o Designed interactive dashboard with an adaptive IBM Watson chatbot to customize experiences through dynamic content adjustment based on user prompts.

Education

Bachelor of Science: Computer Science

2014-05 - 2018-12

University of Windsor - Windsor, ON
